

## **Halothane / Fluothane**

Halothane is a time-tested, cost effective inhalational anaesthetic used for effective induction and maintenance of anaesthesia.

Use of halothane in paediatric anaesthesia should be restricted to hospitals only.

Piramal Critical Care is the largest producer of Halothane for both human and veterinary use.

### **Composition and Description**

Active ingredient Halothane BP 100% v/v.

Pharmaceutical form Halothane is a clear liquid for use in a vaporiser to produce an inhalation gas.
